ICE FTSE 100 Index Total Return Future

A more flexible way to trade

The ICE FTSE 100 Index Total Return Future (TRF) allow investors to take directional exposure to the underlying FTSE 100 Index, the FTSE 100 Distribution Points Index and the Sterling short term funding rate (SONIA). TRFs provide a listed alternative to over-the-counter (OTC) total return swaps to trade implied equity repo, with increased market transparency.

ICE FTSE 100 Index TRFs represent the theoretical total returns exposure to the FTSE 100 Index from the trade date assuming the position is held to expiry and offer market participants an exchange listed mechanism to trade the equity repo curve, locking in on long-term financing spreads. In addition, the proceeding economic exposure associated with a TRF (including market and dividend risk) can be achieved without owning the cash underlying.

Benefits

Increase capital efficiency with margin offsets against correlated offsetting FTSE positions

Replicate OTC TRS market exposure via an exchange listed and centrally cleared contract

Reduce risks associated with Uncleared Margin Rules (UMR)

Accurate daily Mark-to-Market settlements made by daily variation margin payments

ICE: The home of U.K. equity derivatives

ICE is the home of FTSE Russell index-linked derivatives representing a partnership that has spanned over 35 years. ICE's FTSE Index franchise has more than £200bn of notional open interest, making ICE the global leader in U.K. listed derivatives. The franchise incorporates well-known indices such as the FTSE 100, FTSE 250, FTSE 100 Dividend and FTSE UK ESG-Risk Adjusted futures and options, which provides an unrivalled set of tools to measure the performance of all capital and industry segments of the U.K. equity market.
